

MANUEL MUÑIZ

FRONT-END DEVELOPER

Computer Science student with 2 years of work experience in Telecommunications. Currently looking for new opportunities as a Front-End Developer and personal growth.

WORK EXPERIENCE

IP Support at Huawei | September 2023 - September 2024

- Documented procedures, network configurations and issue resolutions.
- Configured and maintained IP/MPLS network equipment, each carrying 40k+ users.
- Monitored daily network issues to ensure quick resolution and optimal performance.
- Improved security and resource efficiency of 300+ network devices by updating and patching software, resulting in a 20% improvement in resource consumption.

IT & Wireless Support at Huawei | September 2022 - September 2023

- Developed scripts to configure external alarms in 90+ radio base stations, minimizing service interruptions by 15% and preventing equipment damage.
- Provided technical support to major Internet service providers in Uruguay, including hardware troubleshooting and system maintenance, reducing operational costs.
- Contributed to a vendor migration project, transitioning 70+ radio base stations in 6 months, delivering the project on time as scheduled.

SKILLS

HTML5, CSS3, Bootstrap, JavaScript, Python, Git, SQL, Linux, Illustrator, Figma.

PROJECTS

GitHub Profile Finder | [Website](#) - [GitHub Repository](#)

This system utilizes the GitHub API to retrieve public information from user profiles, including detailed profile data, public repositories, highlighted contributions and more.

E-Commerce Site | [Website](#) - [GitHub Repository](#)

E-commerce platform designed to simulate the purchase and sale of products online. Users can carry out commercial transactions, from browsing and selecting products to completing payment and arranging delivery.
